This document consists of the annexes of the report

*Citizenship Education at School in Europe – 2017.*

They provide national information and web links on:

- Top level strategies or action plans addressing citizenship education;
- Approaches to citizenship education according to national curricula;
- Online guidance developed or supported by education authorities addressing citizenship education;
- National programmes and initiatives supporting citizenship education through extra-curricular activities and participation in school governance;
- Continuing Professional Development (CPD) activities organised or supported by top level education authorities to help teachers develop the competences needed for delivering citizenship education;
- Top level coordinating bodies for CPD, including on citizenship education.

Information in the annexes is based on qualitative data. It covers the public sector schools and includes both general education and school-based initial vocational education and training programmes in 42 education systems.
ANNEXES

Annex 1: Top-level strategies or action plans, implemented since 2010/11, addressing citizenship education, including in primary, general secondary education and school-based IVET (ISCED 1-3), 2016/17

SPECIFIC STRATEGIES OR ACTION PLANS ON CITIZENSHIP EDUCATION

Belgium – French Community

Citizenship education decrees

A ‘Decree concerning the organisation of a course on philosophy and citizenship education’ at primary level was adopted in October 2015; and in July 2017, a ‘Decree concerning the organisation of a course on philosophy and citizenship education at secondary level’ was adopted. The main areas covered by the decrees include the objectives of the new courses promoting the development of students’ competences and knowledge related to philosophy, citizenship and democracy education, teacher education and professional development. The decrees were implemented at primary level from September 2016 and from September 2017 at lower and upper secondary level.

Timeframe: As of Sept. 2016 for ISCED 1 and as of Sept. 2017 for ISCED 2 and 3 (general and IVET)

France

Great school mobilisation for the values of the Republic

This action plan that has been gradually implemented since spring 2015. It consists of 11 measures for citizenship education proposed by the Ministry of Education, which cover the entire period of school education, including the pre-primary level and vocational education and training. The overarching aims of the action plan are: to ensure that secularism and the transmission of republican values is one of the main drivers in schools; to develop citizenship and a culture of engagement with all partners in schools; to fight inequalities and foster social diversity; to strengthen the sense of belonging in the Republic; and to mobilise higher education and research. Next to measures directly targeting schools and students – such as the ‘Citizen’s reserve’ (Réserve citoyenne), a pool of key actors promoting citizenship education in each académie (i.e. the main administrative districts of the Ministry of Education and Ministry of Higher Education and Research) or the ‘Citizen’s pathway’ (Parcours Citoyen), which sets out a strengthened, continuous focus on moral and civic education throughout students’ school career, from their entry to school until their final year – the action plan includes a national plan for the continuing professional training of teachers and education professionals (see also Case study 4).

National Strategy for Citizenship Education and Citizenship Education Guidelines

The National Citizenship Education Strategy (ENEC) was developed in line with the priorities defined in the Programme of the XXI Constitutional Government for the area of education, and based on a proposal by the Working Group on Education for Citizenship. The ENEC will be implemented as of 2017/18. Its aim is to help students develop and participate actively in projects that promote fairer and more inclusive societies within the context of democracy, respect for diversity and the defence of human rights. The inclusion of this area in the curriculum is justified by the recognition of schools’ responsibility to provide adequate preparation for active and informed citizenship, as well as appropriate education to achieve the ‘UN Sustainable Development Goals’. The ENEC builds on previous developments in this area, most notable the ‘Citizenship Education Guidelines’ that were introduced by the Ministry of Education/ Directorate-General for Education in 2012.

(15) From 2017/18, it has become compulsory for schools to organise a social-civic activity at each grade of ISCED 2.

(16) Since 2017-2018, the subject ‘life and society’ has also been compulsory at primary level (grades 1-6).

(17) Schools decide whether to teach these subjects.

(19) Schools can choose which optional subject they offer to students, which implies that citizenship education can be offered as a separate subject or integrated into other subjects.

(20) The subject ‘knowledge about society’ must be taught for one of the grades at ISCED 3, at the discretion of the school head.

(21) Since 2017/18, ‘citizenship and development’ is being piloted in 230 public and private school clusters in the form of a compulsory separate subject in grades 5 to 9, and as a cross-curricular theme in the remaining education levels.

(24) School-based IVET is not a separate stream of provision. Therefore the approach to citizenship for students who may be taking some vocational courses is the same as for those taking general education courses.

(25) Schools may decide to implement this programme of study in fulfilment of the statutory requirement set out in legislation, to provide a ‘balanced and broadly-based curriculum’ which ‘promotes the spiritual, moral, cultural, mental and physical development of pupils at the school and of society’.

(26) The content of the citizenship subject set out in the curriculum framework document (applying to maintained schools only, not to Academies) must be delivered, but schools can decide through which approach (separate subject, integrated, cross-curricular).

Citizenship Education at School in Europe – 2017
Annexes: National Information and Websites

This document consists of the annexes of the report Citizenship Education at School in Europe – 2017. They provide national information and web links related to the following aspects of citizenship education: top level strategies or action plans; curriculum approaches; online guidance and support materials; extra-curricular learning activities and participation in school governance; continuing professional development activities for teachers; and top level coordinating bodies for teacher training.

Information in the annexes is based on qualitative data. It covers the public sector schools and includes both general education and school-based initial vocational education and training programmes in 42 education systems.

The Eurydice Network’s task is to understand and explain how Europe’s different education systems are organised and how they work. The network provides descriptions of national education systems, comparative studies devoted to specific topics, indicators and statistics. All Eurydice publications are available free of charge on the Eurydice website or in print upon request. Through its work, Eurydice aims to promote understanding, cooperation, trust and mobility at European and international levels. The network consists of national units located in European countries and is co-ordinated by the EU Education, Audiovisual and Culture Executive Agency. For more information about Eurydice, see http://ec.europa.eu/eurydice.
