

CodeWeek.

MASSIVE OPEN ONLINE COURSE

Navigating innovative technologies across the curriculum

The EU Code week “Navigating innovative technologies across the curriculum” MOOC aims to integrate coding, computational thinking, and immersive tech in diverse subjects beyond traditional classrooms. Explore augmented reality, virtual reality, and cross-curricular projects. Join peers and a dynamic community of educators in blended learning – let’s transform education collaboratively!

The MOOC allows you to:

- » Learn about the EU Code Week initiative and its opportunities.
- » Integrate coding, programming, and computational thinking into teaching.
- » Explore interdisciplinary coding ideas.
- » Grasp virtual and augmented technologies.
- » Craft immersive classroom experiences.

Key information:

- » **Target audience:** This course is open to educators who want to introduce coding, computational thinking, virtual and augmented reality into their classrooms as interdisciplinary, cross-curricular projects. No previous experience or knowledge is needed to take this course.
- » **Start date:** 09 October 2023
- » **End date:** 15 November 2023
- » **Weekly commitment:** 5.5 hours
- » **Total workload:** 16 hours
- » **Language:** English
